

The "Unknown Mares" of the American Morgan Horse CD
Researched by : Ina M. Ish
Part One

With Thanks and acknowledgment to Marsha Valance for initiating the idea of this project, and providing the impetus to get me started. To Laura S. Algranti and Mary Jean Vasiloff for the loan of Source Materials. To Joanne Curtis for ongoing encouragement to keep me going. My Thanks to all of you.

Sources of Material: American Morgan Horse Registry, Vol. I, II, III, IV, V, VI, VII, VIII and Calvin D. Hanson's book The Morgan Horse Foundation, A Computerized Analysis. In addition the AMHA CD First and Third Release.

ORGANIZATION: I have listed the mares in groups, first the X Registered mares from The Cross Ranch. Starting with the X registered mares, I have used the Registry Volumes to pickup the listing of the unregistered dam and her breeding where it is listed. I have done the same for the LU Sheep Co mares, but listed in order of the sire's progeny. I have listed the Cross Ranch and the LU first, since in all probability, the descendants of those two ranches are most numerous today. Following the above mentioned groups, are listed by sire a great many of the other "Unknowns" from the AMHA CDs. For this research I have used the AMHA CDs, The Registry and Calvin Hanson's book. I have not listed all the progeny of all the mares, but have given progeny lists where the progeny contain well known horses who may be found on pedigrees of today.
